RESEARCH INTERESTS

My research focuses on the understanding of human and nonhuman learning and behavioural processes, especially how they are regulated by aversive events (e.g., effects of aversive stimuli on memory, self-control, problem solving, verbal behavior, rule following, and conciliation). My ongoing agenda entails five areas, namely (a) interactions between verbal and nonverbal behavior (e.g., how aversive consequences affect the consistency between saying and doing); (b) measurement of emotion regulation strategies and how they affect other behavioral processes (e.g., effects of reappraisal-based regulation on conciliation and self-control); (c) assessing and improving the effectiveness of behavioral teaching methods (e.g., evaluating the effectiveness of a method called *Interteaching* and how it could reduce procrastination in college students); (d) establishment and maintenance of complex behavior via stressful events (e.g., conditional discriminations regulated by aversive consequences); and (e) analysis of conceptual, historical, and disciplinary aspects of psychology (e.g., history and need for alternative research methods in psychology).

SOFTWARE DEVELOPMENT FOR PSYCHOLOGICAL RESEARCH

2017 – present. Computerized Task for studying effects of aversive and appetitive stimuli on self-control and impulsive behavior.

Hurtado-Parrado, C., Bohórquez, M. C., & Sánchez, C.

Keywords: verbal behavior, self-control, impulsivity, aversive control.

Knowledge area: Behavior Analysis, Psychology

Platform: Macromedia Authorware 7.01

Environment: Windows.

2015 - present. Computerized matching-to-sample task for studying the acquisition and maintenance of conditional discrimination via appetitive and aversive contingencies.

Hurtado-Parrado, C., Arias, M., & Cifuentes, J.

Keywords: verbal behavior, conditional discrimination, matching to sample, aversive contingencies.

Knowledge area: Behavior Analysis, Psychology

Platform: Macromedia Authorware 7.01

Environment: Windows.

2016. Translation and Adaptation of the Computer-Aided Personalized System of Instruction (webCAPSI) to Spanish.

Hurtado-Parrado, C., Arias, M., & González, C.

2012 – present. Computerized Task for automatic shaping of written verbal reports of performance during a multiple schedule of reinforcement.

Hurtado-Parrado, C., Arias, M., González, C.

Keywords: verbal behavior, shaping, schedules of reinforcement.

Knowledge area: Behavior Analysis, Psychology

Platform: Macromedia Authorware 7.01

Environment: Windows.

2008. Computerized Task for training and evaluating referential behavior.

Hurtado-Parrado, C. & Ortiz, G.

Keywords: behavior analysis, second order matching to sample, conditional discriminations, experimental psychology, learning, language, transference tests.

Knowledge area: Symbolic behavior (Behavior Analysis, Psychology)

Platform: Macromedia Authorware 7.01

Environment: Windows.

2005. Computerized Task for training stimulus equivalence phenomena

Hurtado-Parrado, C. & Robayo, M.

Keywords: behavior analysis, second order matching to sample, conditional discriminations, experimental psychology, learning, language, transference tests.

Knowledge area: Symbolic behavior (Behavior Analysis, Psychology)

Country: Colombia (Bogotá) – Universidad Nacional de Colombia.

Platform: Macromedia Authorware 7.01

Environment: Windows.

2003 – 2004. Second order matching to simple computerized task.
Hurtado-Parrado, C. & Robayo, M.

Keywords: behavior analysis, second order matching to sample, conditional discriminations, experimental psychology, learning, language, transference tests.

Knowledge area: Symbolic behavior (Behavior Analysis, Psychology)

Platform: Macromedia Authorware 6.0

Environment: Windows.
